

# The BPO Automation Accelerator

Stop paying people to do work a machine should handle.

Outsourcing alone just moves manual work somewhere cheaper. We re-engineer the process itself — contracts, AP/AR, onboarding — and apply automation on top, so the work that used to need a team runs largely on its own, with your staff supervising the exceptions and driving growth.

## PROOF POINTS

**90%**

**AUTOMATED**

Repeatable work runs itself — staff owns exceptions

**3×**

**MORE OUTPUT**

Same headcount drives more revenue throughput

**2-4**

**WEEKS TO LIVE**

Re-engineered process deployed in weeks, not quarters

## HOW IT WORKS

### • Process Mapping & Re-Engineering

We find the real workflow — not the org chart version. Then rebuild it from scratch around what AI makes possible.

### • Route Exceptions to People

Your team stops doing repetitive entry and starts supervising outcomes. Exceptions surface with context so decisions take seconds.

### • Automate the Repeatable 90%

Contracts routed and flagged automatically. AP/AR matched and queued without human touch. Onboarding steps triggered and tracked.

### • Grow Without Adding Headcount

The same team processes 3× the volume. Revenue grows, costs flatten, and every new hire you do make is additive.

## BEFORE & AFTER

| BEFORE                     |                                  |
|----------------------------|----------------------------------|
| Process execution          | <b>Manual, team-dependent</b>    |
| Output per employee        | <b>Fixed — labor-constrained</b> |
| Contract / AP / onboarding | <b>Weeks of coordination</b>     |
| Headcount to grow revenue  | <b>Add people to add output</b>  |

| AFTER — WITH THE BPO ACCELERATOR |                                    |
|----------------------------------|------------------------------------|
| Process execution                | <b>Automated, exception-driven</b> |
| Output per employee              | <b>3× — automation-amplified</b>   |
| Contract / AP / onboarding       | <b>Days or hours — auto-routed</b> |
| Headcount to grow revenue        | <b>Same team, more revenue</b>     |

## PROOF — CLIENT SUCCESS STORY

### Proven Results **BACK-OFFICE AUTOMATION**

**10.0 NPS**

Perfect client score

**Current state:** Back-office workflows — contracts, AP/AR, onboarding — executed manually by teams whose capacity caps the company's growth.

**Future state:** Repeatable 90% automated; exceptions routed with context. Same headcount, 3× throughput. Revenue grows without adding people.

**90% Auto**
