

The Site Finder Accelerator

Stop spending months evaluating sites you'll never build on.

Site evaluation drags on for weeks — zoning, permits, and cost math redone by hand every time an input changes. We replace that process with live nodes that recompute instantly, so you screen and rank locations in hours instead of months — and never redo the same math twice.

FASTEST SCREENER

First to evaluate wins the best sites

HOW IT WORKS

• Zoning & Permit Scoring

Every candidate site is run through automated zoning, permit feasibility, and regulatory checks — before anyone spends time on it.

• Side-by-Side Site Ranking

Candidate locations are scored and ranked on the metrics that matter to your deal — density, cost, timeline, and feasibility — all in one view.

• Live Cost Recomputation

Change one input and the entire model re-runs in seconds. No more redoing layout math by hand every time a variable shifts.

• Speed as a Competitive Moat

The teams that evaluate sites fastest win the best locations. The accelerator makes you the first mover in every market you target.

BEFORE & AFTER

BEFORE

Site evaluation time	~2 months
Layout math per change	3 days manual
Sites screened / cycle	1-2 at a time
Market position	Slow mover

AFTER — WITH THE SITE FINDER ACCELERATOR

Site evaluation time	Under 3 hours
Layout math per change	Under 2 minutes
Sites screened / cycle	Many in parallel
Market position	First mover advantage
